

CORONA

Virus Disease (Covid-19)

Coronavirus disease (COVID-19) is an infectious disease caused by a newly discovered coronavirus. Most people who fall sick with COVID-19 will experience mild to moderate symptoms and recover without special treatment.

#STAY HOME
STAY SAFE

What Are The Main Symptoms?

Most common symptoms:

- fever
- dry cough
- tiredness

Less common symptoms:

- aches and pains
- sore throat
- diarrhoea
- conjunctivitis
- headache
- loss of taste or smell
- a rash on skin, or discolouration of fingers or toes

Serious symptoms:

- difficulty breathing or shortness of breath
- chest pain or pressure
- loss of speech or movement

How to prevent yourself and others from COVID-19?

WEAR MASK

- Before touching the mask, clean your hands with an alcohol-based hand rub or soap and water.
- Inspect the mask for tears or holes, do not use a mask that is damaged.
- Adjust the mask to cover your mouth, nose, and chin, leaving no gaps on the sides.

WASH HANDS

Clean hands frequently and thoroughly with soap and water, or alcohol-based hand sanitizer

AVOID PHYSICAL CONTACT

Avoid close contact with anyone with a cold or flu-like symptoms, and if you have a fever or are coughing yourself please keep a distance from others or make sure to use a mask.

VACCINATE IF AVAILABLE

While COVID-19 vaccine supplies are limited, health workers at high risk of exposure and older people should be prioritised for vaccination.

What to Do If You Are Sick?

Stay home except to get medical care

- **Stay home.** Most people with COVID-19 have mild illness and can recover at home without medical care. Do not leave your home, except to get medical care. Do not visit public areas.
- **Take care of yourself.** Get rest and stay hydrated. Take over-the-counter medicines, such as acetaminophen, to help you feel better.
- **Stay in touch with your doctor.** Call before you get medical care. Be sure to get care if you have trouble breathing, or if you think it's an emergency.
- **Avoid public transportation,** ride-sharing, or taxis.

Separate yourself from other people

As much as possible, stay in a specific room and away from other people and pets in your home. If possible, you should use a separate bathroom. If you need to be around other people or animals in or outside of the home, wear a mask.

Tell your close contacts that they may have been exposed to COVID-19. An infected person can spread COVID-19 starting 48 hours (or 2 days) before the person has any symptoms or tests positive. By letting your close contacts know they may have been exposed to COVID-19, you are helping to protect everyone.

Use virtual medium for communication

Virtual communication is how people interact with others without being in the same room. It's used by remote teams in an office environment and practically every industry. For most employees, business communication takes place over many different channels: Instant messaging apps: iMessage, Slack, or WhatsApp.
